

# DRONE SERVICES

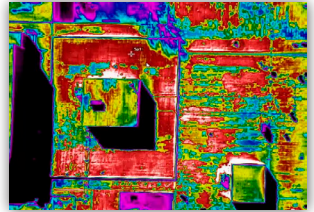

IMEG's drone operation consists of a fleet of versatile, unmanned aircrafts and highly qualified pilots that are certified under FAA Part 107. Our team can provide a wide range of services within all phases of a project, including master planning, 3D mapping, inspection, and marketing. The use of drones promotes safety, creates efficiency, and aids in visualization.

## APPLICATIONS

### Land Surveying and GIS

- Aerial Imagery
  - Ortho-Rectified
  - Oblique (angled)
- 3D Mapping
  - Topography
  - 3D modeling
- Volumetric Analysis
  - Stockpiles
  - Quarries
- ALTA \ ACSM Land Title Survey
  - Table A, Item 15

### Construction and Inspection

- Construction
  - As-built
  - Observation
- Structures
  - Bridges
  - Building
  - Utility infrastructure
- Thermal
  - Heat loss detection
  - Agricultural analysis
  - Search and rescue
- Traffic analysis

### Marketing and Promotional

Imagery services for use in client marketing efforts
